

## **Landscape Designer/Landscape Architect**

**Position Summary:** The **Landscape Designer/Landscape Architect** position reports to the Director of Design and is responsible for assisting with the creation of cutting-edge, client-focused designs. You will collaborate with the design team to ensure the successful execution of projects that exceed client expectations.

### **Core Job Responsibilities:**

- Design assistance on larger scale, high end residential landscape designs with a focus on creating thoughtful and compelling designs.
- Partner with Project Managers and Lead Designers to create budgets and proposals.
- Attend client meetings to help communicate design intent as needed.

### **Tasks and Deliverables:**

- Help with site analysis and the creation of base plans.
- Aid with the production of plans and graphics at all design stages as needed to clearly communicate design intent to the Client.
- Assist with the development of detailed construction drawings to help the design vision become reality.
- Provide take-offs as needed to allow Project Managers/Sales to create accurate budgets and proposals.

### **Qualifications and Requirements:**

- Bachelor's Degree in Landscape Architecture plus a minimum of 5 years of industry experience.
- Proficiency in AutoCAD and Microsoft Office is required; experience with SketchUp, Photoshop, and Lumion is strongly preferred as is the ability to learn LMN/Aspire.
- Strong time management and communication skills
